Version tested 1.0.41.0

DESCRIPTION OF TESTING

Testronic completed Functionality and Compatibility testing of the Digital File Check (DFC) application.

The functionality testing conducted included:

- Blocking and removing of P2P programs
- Default and advanced Searches for
 - File sharing programs
 - Music files
 - Video files
- Application functionality across different user accounts
- Traffic monitoring
- Updates to Definitions

Testing considered how general computer users interact with the system and some of the testing time was devoted to “ethical hacking”.

Compatibility testing checked the Digital File Check application installs and runs as expected across PC and MAC operating systems*.

SUMMARY OF FINDINGS

Having conducted the testing Testronic can confirm the following about the Digital File Check application:

- **Viruses and malware** – The application was tested for viruses and malware; the results of which show that Digital File Check is safe for download and use on PC and MAC configurations*.
- **Application communication** – The internet traffic was monitored across the Digital File Check application’s full set of features to ensure the application did not attempt to communicate with any third party web services. There was no communication to any third parties, keeping results locally.
- **Application functionality** – The application functionality corroborates with the description accompanying the program: “A free, easy to use software designed to

help stop your computer being used for illegal sharing and downloading of music, films and TV programs. Digital File Check is 100 per cent for your personal and private use only. The results of using the software remain on your computer and are not disclosed to anyone else.”

- [Help file and FAQ](#) – The application functionality corroborates with the content of these resources

*The Digital File Check application was tested on Windows: XP, Vista, 7 & 8, Mac: 10.5, 10.6, 10.7 & 10.

CHECKLIST OF KEY AREAS TESTED

This is a checklist highlighting key areas of the application tested. Testing was not limited to what is shown within this section; a significant proportion of testing was also focused on exploratory testing.

Traffic Monitoring

- ✓ Results of using the software remain on the individual user’s computer and are not disclosed to any third parties (including Internet Service Provider).

Multiple user accounts

- ✓ Application installs and functions as expected on the compatible operating systems
- ✓ Application installs on the different user accounts on the computer
- ✓ Once installed on a computer by the admin user, the program works with all user profiles on that computer
- ✓ A user cannot get access to the Digital File Check program on a non-admin account without a valid username and password
- ✓ Application cannot be uninstalled by anyone except the admin user
- ✓ Application can find files stored on other user accounts
- ✓ The Digital File Check application did not contain any viruses or malware

External data storage

-
- ✓ Application can search and flag files on USB keys
 - ✓ Application can search and flag files on a connected Phone
 - ✓ Application can search and flag files on an external HD

Programs section of Digital File Check application

- ✓ Quick & Full search functions correctly for application supported programs
- ✓ Blocking a program functions correctly
- ✓ Removing a program functions correctly

Shared folders section of Digital File Check application

- ✓ Music and audio search and delete functions correctly
- ✓ Film, TV and other Video search and delete functions correctly

Multimedia section of Digital File Check application

- ✓ Music and Audio search functions correctly
- ✓ Film, TV and other Video search functions correctly

Options, About & Help sections

- ✓ Changing the details within this section with valid and invalid data
- ✓ Check for updates functions correctly
- ✓ Testing instructions within the Help and FAQs sections were checked to determine if they assist/ corroborate with the application

Website links

- ✓ Tested that the legal music link works across current popular browsers
